## Your Personal guide to Two Factor Authentication (2FA)

It's much simpler than it sounds we promise! 2FA is a simple and easy security feature to help keep your account secure!

Login Online +  
Verification Code = Success

All yours. Honestly

## What is 2FA you ask?

---

2FA is an added security feature we offer to keep your money extra safe!

You'll receive a text message containing a code when you transact above a certain limit or add new contacts on internet or mobile banking. Simply enter the code into the app or internet banking to proceed with the transaction. Easy right?

This is just our way of making sure it's not a fraudulent transaction to keep your money safe and secure.

2FA is automatically set up when you provide us with your mobile number.

We care about you and the security of your money so

we want all our customers to have this feature without having to move a finger.

Make sure you have provided us with your mobile number by contacting 1300 GO 4 GOLD otherwise you may be restricted in what you can do.

You may opt out of 2FA however, this means you will have view only access in your Internet or mobile app

All yours. Honestly
